

California Financing Coordinating Committee 2013 Funding Fairs

INFRASTRUCTURE FINANCING FOR THE 21ST CENTURY

California Financing Coordinating Committee (CFCC)

What is CFCC?

The California Financing Coordinating Committee (CFCC) was formed in 1998 and is made up of seven funding members: five state, two federal. CFCC members facilitate and expedite the completion of various types of infrastructure projects helping customers combine the resources of different agencies. Project information is shared between members so additional resources can be identified. CFCC members conduct free funding fairs statewide each year to educate the public and potential customers about the different member agencies and the financial and technical resources available.

Purpose of CFCC Funding Fairs

CFCC Funding Fairs provide opportunities to obtain information about currently available infrastructure grant, loan and bond financing programs and options. Each attendee receives a copy of all slide presentations and additional useful infrastructure financing material. Funding Fairs also provide an opportunity for attendees to speak directly with program staff about specific projects and issues affecting their community.

Who should attend?

Public works and local government representatives including city managers and planners, economic development and engineering professionals, officials from privately owned facilities, water and irrigation district managers, financial advisors and project consultants.

Eligible Project Types

CFCC Agencies fund the following types of eligible projects such as drinking water, waste water, solid waste, water quality, water supply, water conservation, energy efficiency, flood management, community facilities, streets and highways, and emergency response vehicles.

California Department of Public Health

Funding for Public Water Systems

Lance Reese
Pipeline Unit Chief

George Faggella
Capacity Development Coordinator

Division of Drinking Water and Environmental Management

Purpose of CDPH Drinking Water Funding Programs

- * To provide funding to eligible public water systems to bring them into compliance with safe drinking water standards.
- * Priority is based on risk to public health.
- * Each funding program has specific requirements, objectives and/or priorities.

Major Funding Sources

- * **Drinking Water State Revolving Fund 1998 (DWSRF)**
 - * Approximately \$100M-\$150M annually: This includes ~\$70M from USEPA, \$17M from State match and \$40M from P&L. Low-interest loans and some grants [HSC 116760.10 – 116762.60]
 - * Proposition 50 of 2002 (P50)
 - * Authorized \$485M: Grants (local assistance), State Operations and Match for DWSRF [WC 7950 – 79534]
 - * Proposition 84 of 2006 (P84)
 - * Authorized \$300M: Grants, (local assistance), State Operations and Match for DWSRF as well as \$10M for emergency grants [PRC 75020 – 75025]

Prop. 84 Grant Funding

Emergency Grants:

- * Public Resources Code Section 75021 –\$10M allocated ~ \$7M remaining
- * Emergency = sudden unanticipated event such as earthquake, fire, landslide, well collapse; no water!
- * Unique in that we can fund alternative water supply
- * Cap at \$250K per project
- * For very small projects, \$10K or less, we can authorize by oral agreement
- * New: allocate up to \$2 million for interim water supplies for communities exceeding a primary drinking water standard, \$50,000 maximum (also \$2 million from SWRCB)

Drinking Water State Revolving Fund (DWSRF)

- * Intended to bring eligible public water systems into compliance with safe drinking water standards
- * US EPA provides the state with a capitalization grant each year
- * The DWSRF is to be operated to exist in perpetuity
- * Eligibility:
 - * Provides funding for Public Water Systems: Community Water Systems, and Non-Transient Non-Community Systems – not for profit, typically schools.
 - * A legal entity must exist that has authority to enter into contracts and incur debt on behalf of the community to be served and owns the PWS [HSC 116700.50]
 - * Funds can be used for Feasibility/Planning Studies (up to \$500K) or Construction (max grant \$3M)

Drinking Water State Revolving Fund (DWSRF)

Priorities/Project Ranking:

- * Annual Intended Use Plan describes priorities
- * 15 categories of eligible projects [A through O]
- * Categories based on health risk:
 - * A - Documented waterborne disease outbreaks
 - * B - Microbial contamination
 - * C - Unfiltered surface water and wells with fecal contamination
 - * D - Surface Water Treatment violations, including open reservoirs
 - * E - Water outages (includes severe source/transmission deficit)
 - * F - Nitrate contamination; chronic Total Coliform Rule violations
 - * G - Distributed water exceeds chemical or radiological primary MCL
 - * H - Water meters for existing unmetered service connections
- * Funding for construction provided when water system has completed all required preliminary activities (design, environmental review, financial requirements)

Drinking Water State Revolving Fund (DWSRF)

*** Constraints:**

- * DWSRF is a low interest loan program that may provide grants to water systems when needed for affordability
- * Amount of subsidy based on "loan affordability"
TCR = Target Consumer Water Rate 1.5% of MHI
- * Funded project must solve the problem with the most cost effective long term solution
- * Funds can be used only for capital costs and cannot be used for O&M
- * 30% of annual federal contribution can be used for grants
The remainder must be committed to loans
- * Only Disadvantaged Communities (Publicly Owned & Not for Profit water systems) are eligible for grant funding

Drinking Water State Revolving Fund (DWSRF)

- * 2012 Interest Rate for DWSRF loans is 1.7875 %
- * Disadvantaged Communities eligible for 0% interest loans
- * Statewide MHI for 2013 is \$58,724
- * Disadvantaged Community: MHI < 80% Statewide MHI
- * Severely Disadvantaged Community: MHI <60% Statewide MHI
- * Disadvantaged Community can receive up to 80% grant
 - * MHI < \$46,979 TCR is 1.5%
- * Severely Disadvantaged Community can receive up to 100% grant
 - * MHI < \$35,234 TCR is 1.5%

Drinking Water State Revolving Fund (DWSRF)

WaterSMART: Water and Energy Efficiency Grants	US Bureau of Reclamation	Grant	The objective of this Funding Opportunity Announcement (FOA) is to invite States, Indian Tribes, irrigation districts, water districts and other organizations with water or power delivery authority to leverage their money and resources by cost sharing with Reclamation on projects that seek to conserve and use water more efficiently, increase the use of renewable energy and improve energy efficiency, benefit endangered and threatened species, facilitate water markets, or carry out other activities to address climate-related impacts on water or prevent any water-related crisis or conflict. Water conservation, use of water markets, and improved efficiency are crucial elements of any plan to address western U.S. water issues. With leveraged water and energy efficiency grants, an important step will be taken towards increasing conservation for a more efficient use of water in the West.	Under P.L. 111-11, Section 9502, an eligible applicant is a State, Indian tribe, irrigation district, water district, or other organization with water or power delivery authority located in the western United States or United States Territories as identified in the Reclamation Act of June 17, 1902, as amended. Applicants must be willing to cost share 50 percent or more of the total project costs.	NEPA	Projects should seek to conserve and use water more efficiently, increase the use of renewable energy, protect endangered and threatened species, facilitate water markets, or carry out other activities to address climate-related impacts on water or prevent any water-related crisis or conflict.	Projects that are considered normal operations, maintenance, and replacement (OM&R) are not eligible. OM&R is described as system improvements that replace or repair existing infrastructure or function without providing increased efficiency or effectiveness of water distribution over the expected life of the improvement. Any projects or project elements that are part of a congressionally authorized Title XVI project of Public Law 102-575, as amended (43 U.S.C. 390h et seq.), are not eligible for funding under this FOA. A project that proposes using Federal funding for purchasing water is not eligible under this FOA. A project that proposes to construct a building is not eligible for Federal funding under this FOA (e.g., a building to house administrative staff or to promote public awareness of water conservation).	Funding will be awarded at one of two levels: Funding Group I: Up to \$300,000 per agreement for a project up to 2 years. Funding Group II: Up to \$1,500,000 for an agreement for up to 3 years for a small number of projects.	FOA expected on grants.gov in the Fall.	Dean Marrone (303) 445-3577
